NUCLEAR SCIENCE DIVISION

The division has a special interest in Nuclear Science and in advanced energy systems such as nuclear, solar, wind, geothermal, and tidal. Its concern in these fields includes, but is not limited to, research, policy and analysis, development and production.

From the Chair

New York Conference

"New York, New York, it's a wonderful town." The "wonderful town" is the location of the 80th annual conference of the Special Libraries Association from June 10 to 15, 1989.

The theme for the conference is "User and Information Dynamics: Managing Change." The focus of this conference is to be on the user — who are our patrons and how can we better serve them in the context of the computer and telecommunications advances we are experiencing?

Preliminary program planning began at the Denver Conference. The Nuclear Science Division will be co-sponsoring with the Engineering Division and the Metals/Materials Division; a panel presentation on the resources available for the end-user by the technical societies and the effects of the direct participation of the societies in providing information resources on the information industry. Brookhaven National Laboratory will be the site for an informative field trip which we will also co-sponsor with the Engineering Division. Plans are also in place for the annual NSD business meeting which will be followed by a cocktail party open house.

Committees

One of the duties of the Division Chairman is to appoint committee chairmen to assist in the work of the Division. In the August issue of *Sci-Tech News* there is a list of the names and addresses of the officers and committee chairmen.

In this issue, I would like to highlight two of these positions — Bulletin Editor and Membership Chairman. Our Bulletin Editor is Sandra Love of Lawrence Livermore National Laboratory. This is Sandy's second year as our editor. Her job is to gather information of interest to the membership for publication. In the past we have had member sketches and profiles of mem-

bers libraries. Sandy welcomes contributions from all NSD members. Her address and the issues deadline dates are included in each issue of *Sci-Tech News*. In addition, this year, Sandy is serving on the advisory committee for *Sci-Tech News*. She welcomes any suggestions for changes and improvements in format and content that you wish to send to her.

Our Membership Chairman is Cynthia Ortiz of US DOE, Las Vegas. It is Cynthia's responsibility to keep up-to-date records as she receives membership information from the Association officer, to assist in compiling a directory and to write letters of welcome to new members.

These are two of the jobs which are important to keeping a Division running smoothly. I will write about the other Division chairmanships and the responsibilities of those offices in future issues.

Upcoming Publication

One of the advantages of membership in the Nuclear Science Division is to receive a membership directory. Berta Keizur, our immediate past-chair, and I are planning to have a new directory available by the end of the year. You will be hearing more about this later.
